

Career and study information

At the end of the course, you will be able to:
• explain the importance of the environment
• describe the different types of environmental
problems and their causes
• identify the different types of environmental
problems and their causes

Gather helpful information from:

1. [Environmental Science](#)

What are the key skills for the future?

- Critical thinking and problem-solving
- Creativity and innovation
- Communication and collaboration
- Digital literacy and technology skills
- Emotional intelligence and social skills
- Adaptability and resilience
- Leadership and management
- Cross-cultural understanding and global awareness
- Self-learning and continuous improvement
- Teamwork and cooperation

Applied learning

Applied learning is a teaching approach that focuses on the practical application of knowledge and skills. It involves learning through direct experience, such as hands-on activities, projects, and real-world scenarios. This approach helps students develop critical thinking, problem-solving, and communication skills, which are essential for success in the workplace.

What do employers look for?
