

3. Themes

3.1 Landscape themes

The University of Canterbury Campus is a **learning landscape**. Opportunity for learning is threaded across the four themes of the Landscape Master Plan.

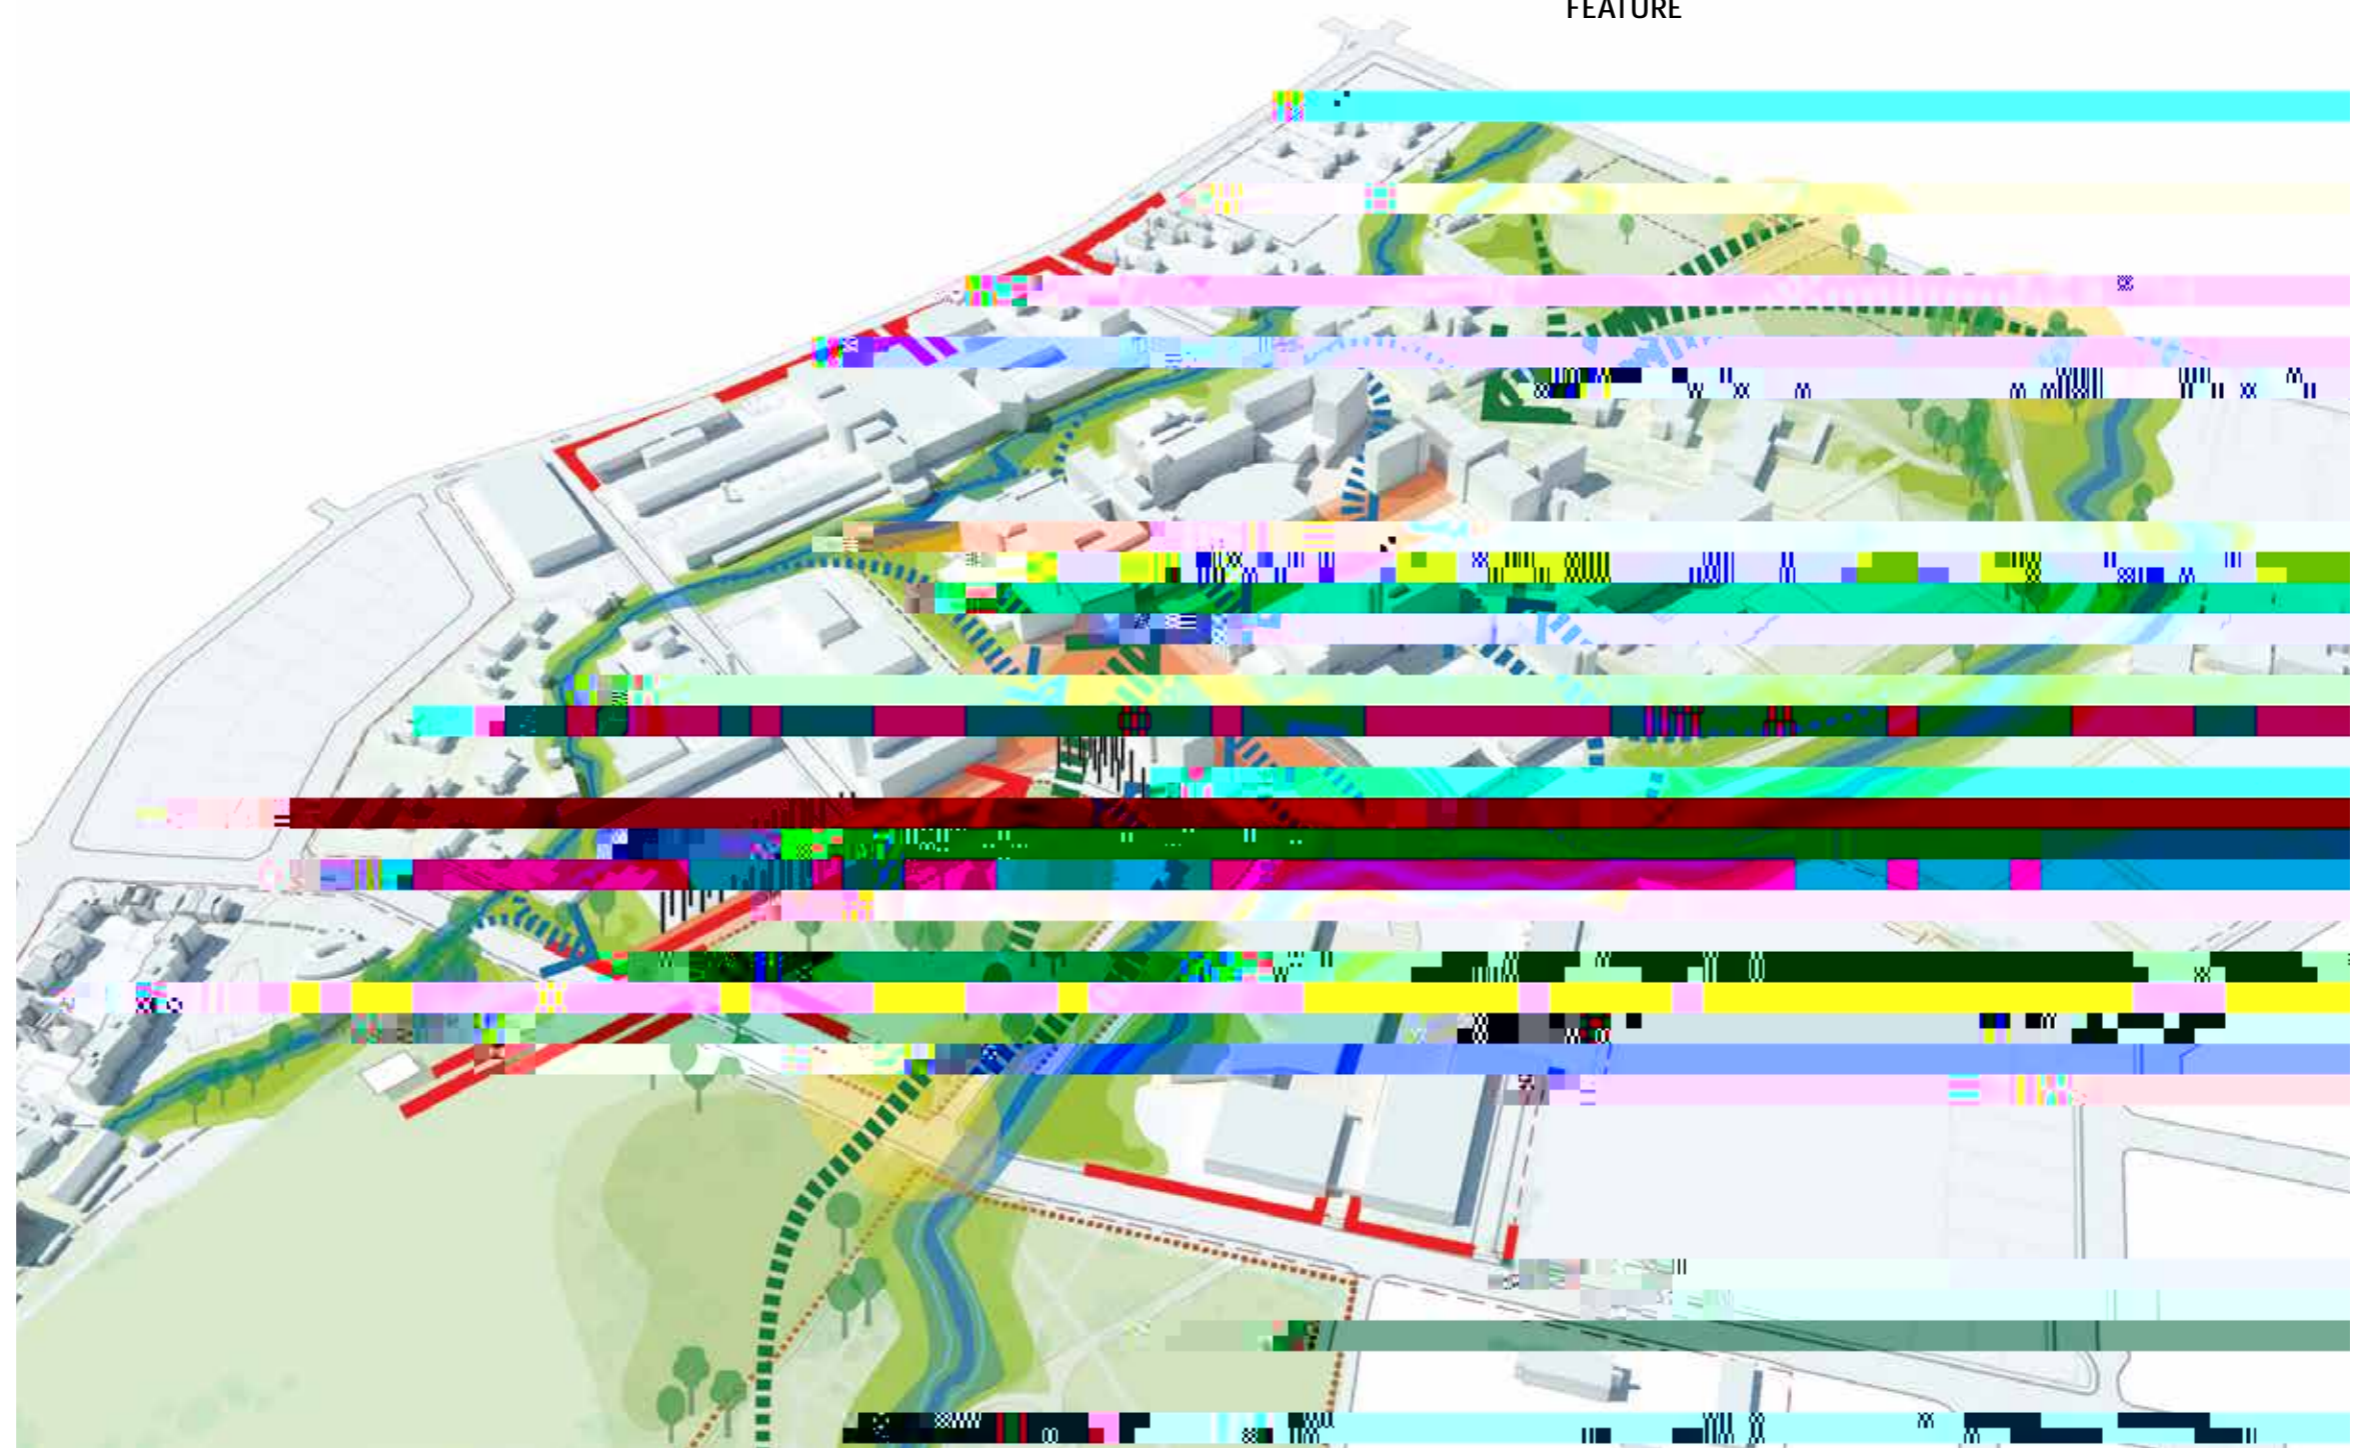

The themes emerged out of the first round of stakeholder consultation workshops. They represent what is important to the University of Canterbury campus community.

The themes underpin the Landscape Master Plan, and provide principles for future projects to be designed and evaluated against. Any future project should reference some or all of the themes, and respond to the accompanying principles.

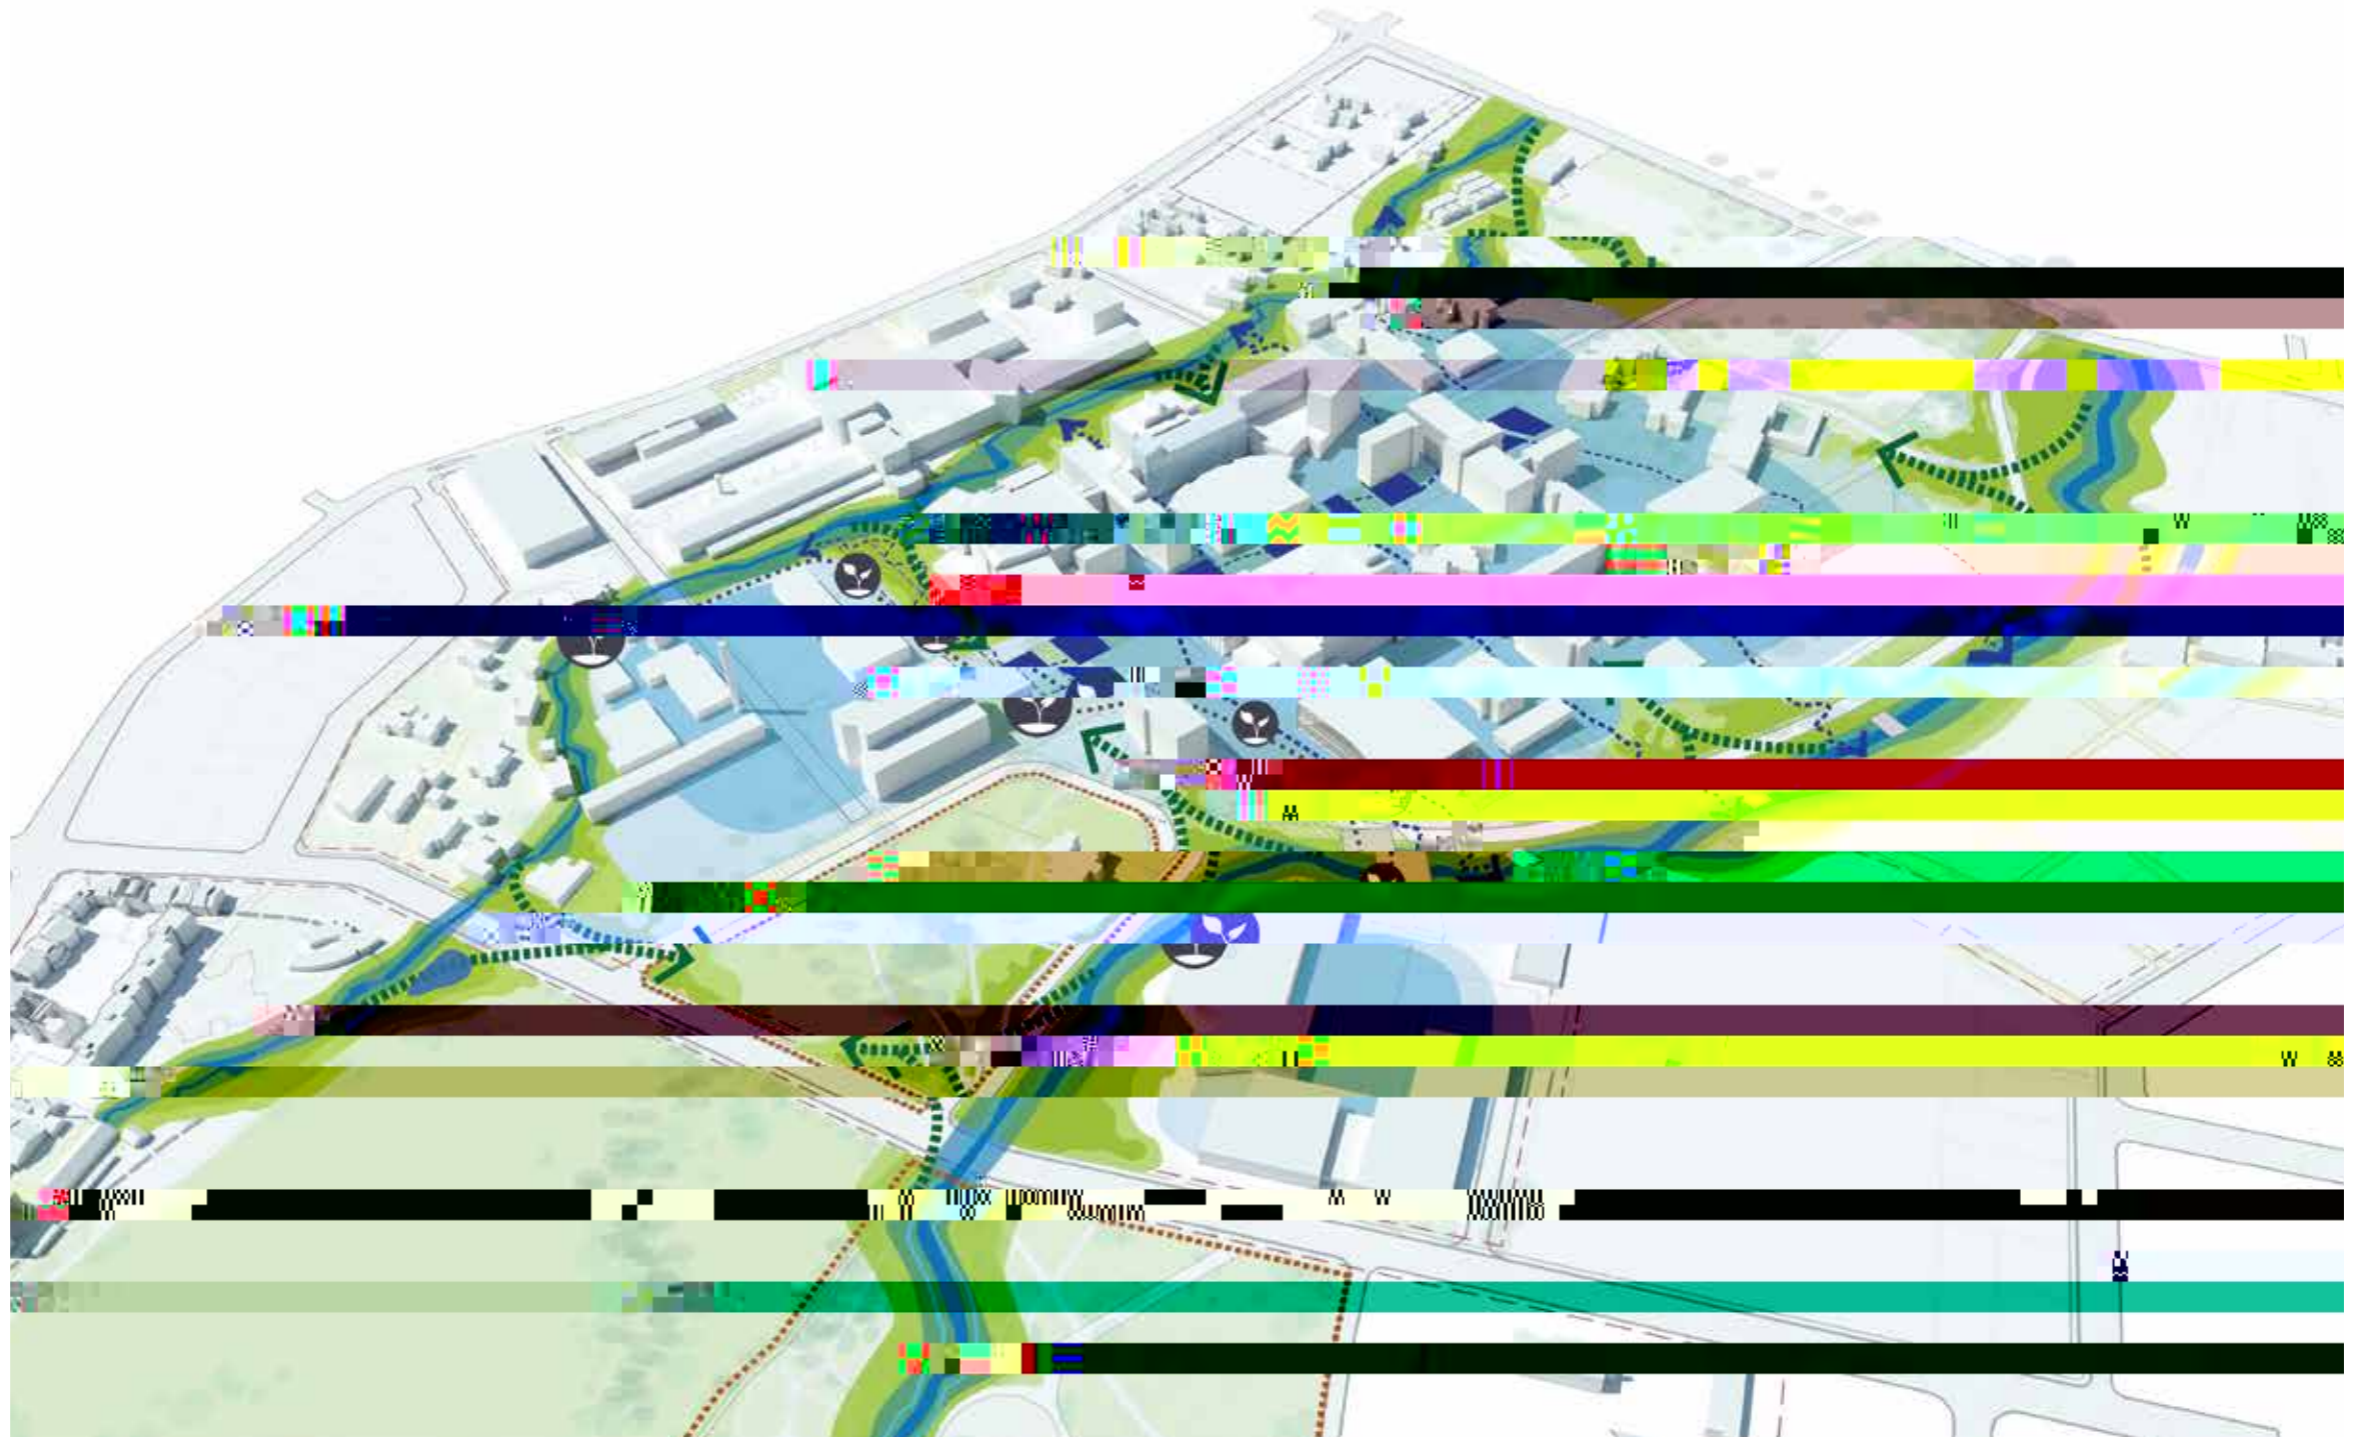

THEMES

-  FORMAL ENTRANCE
-  PARKLAND CHARACTER STITCH
-  NATIVE CHARACTER STITCH
-  VERTICAL GATEWAY FEATURE

.....

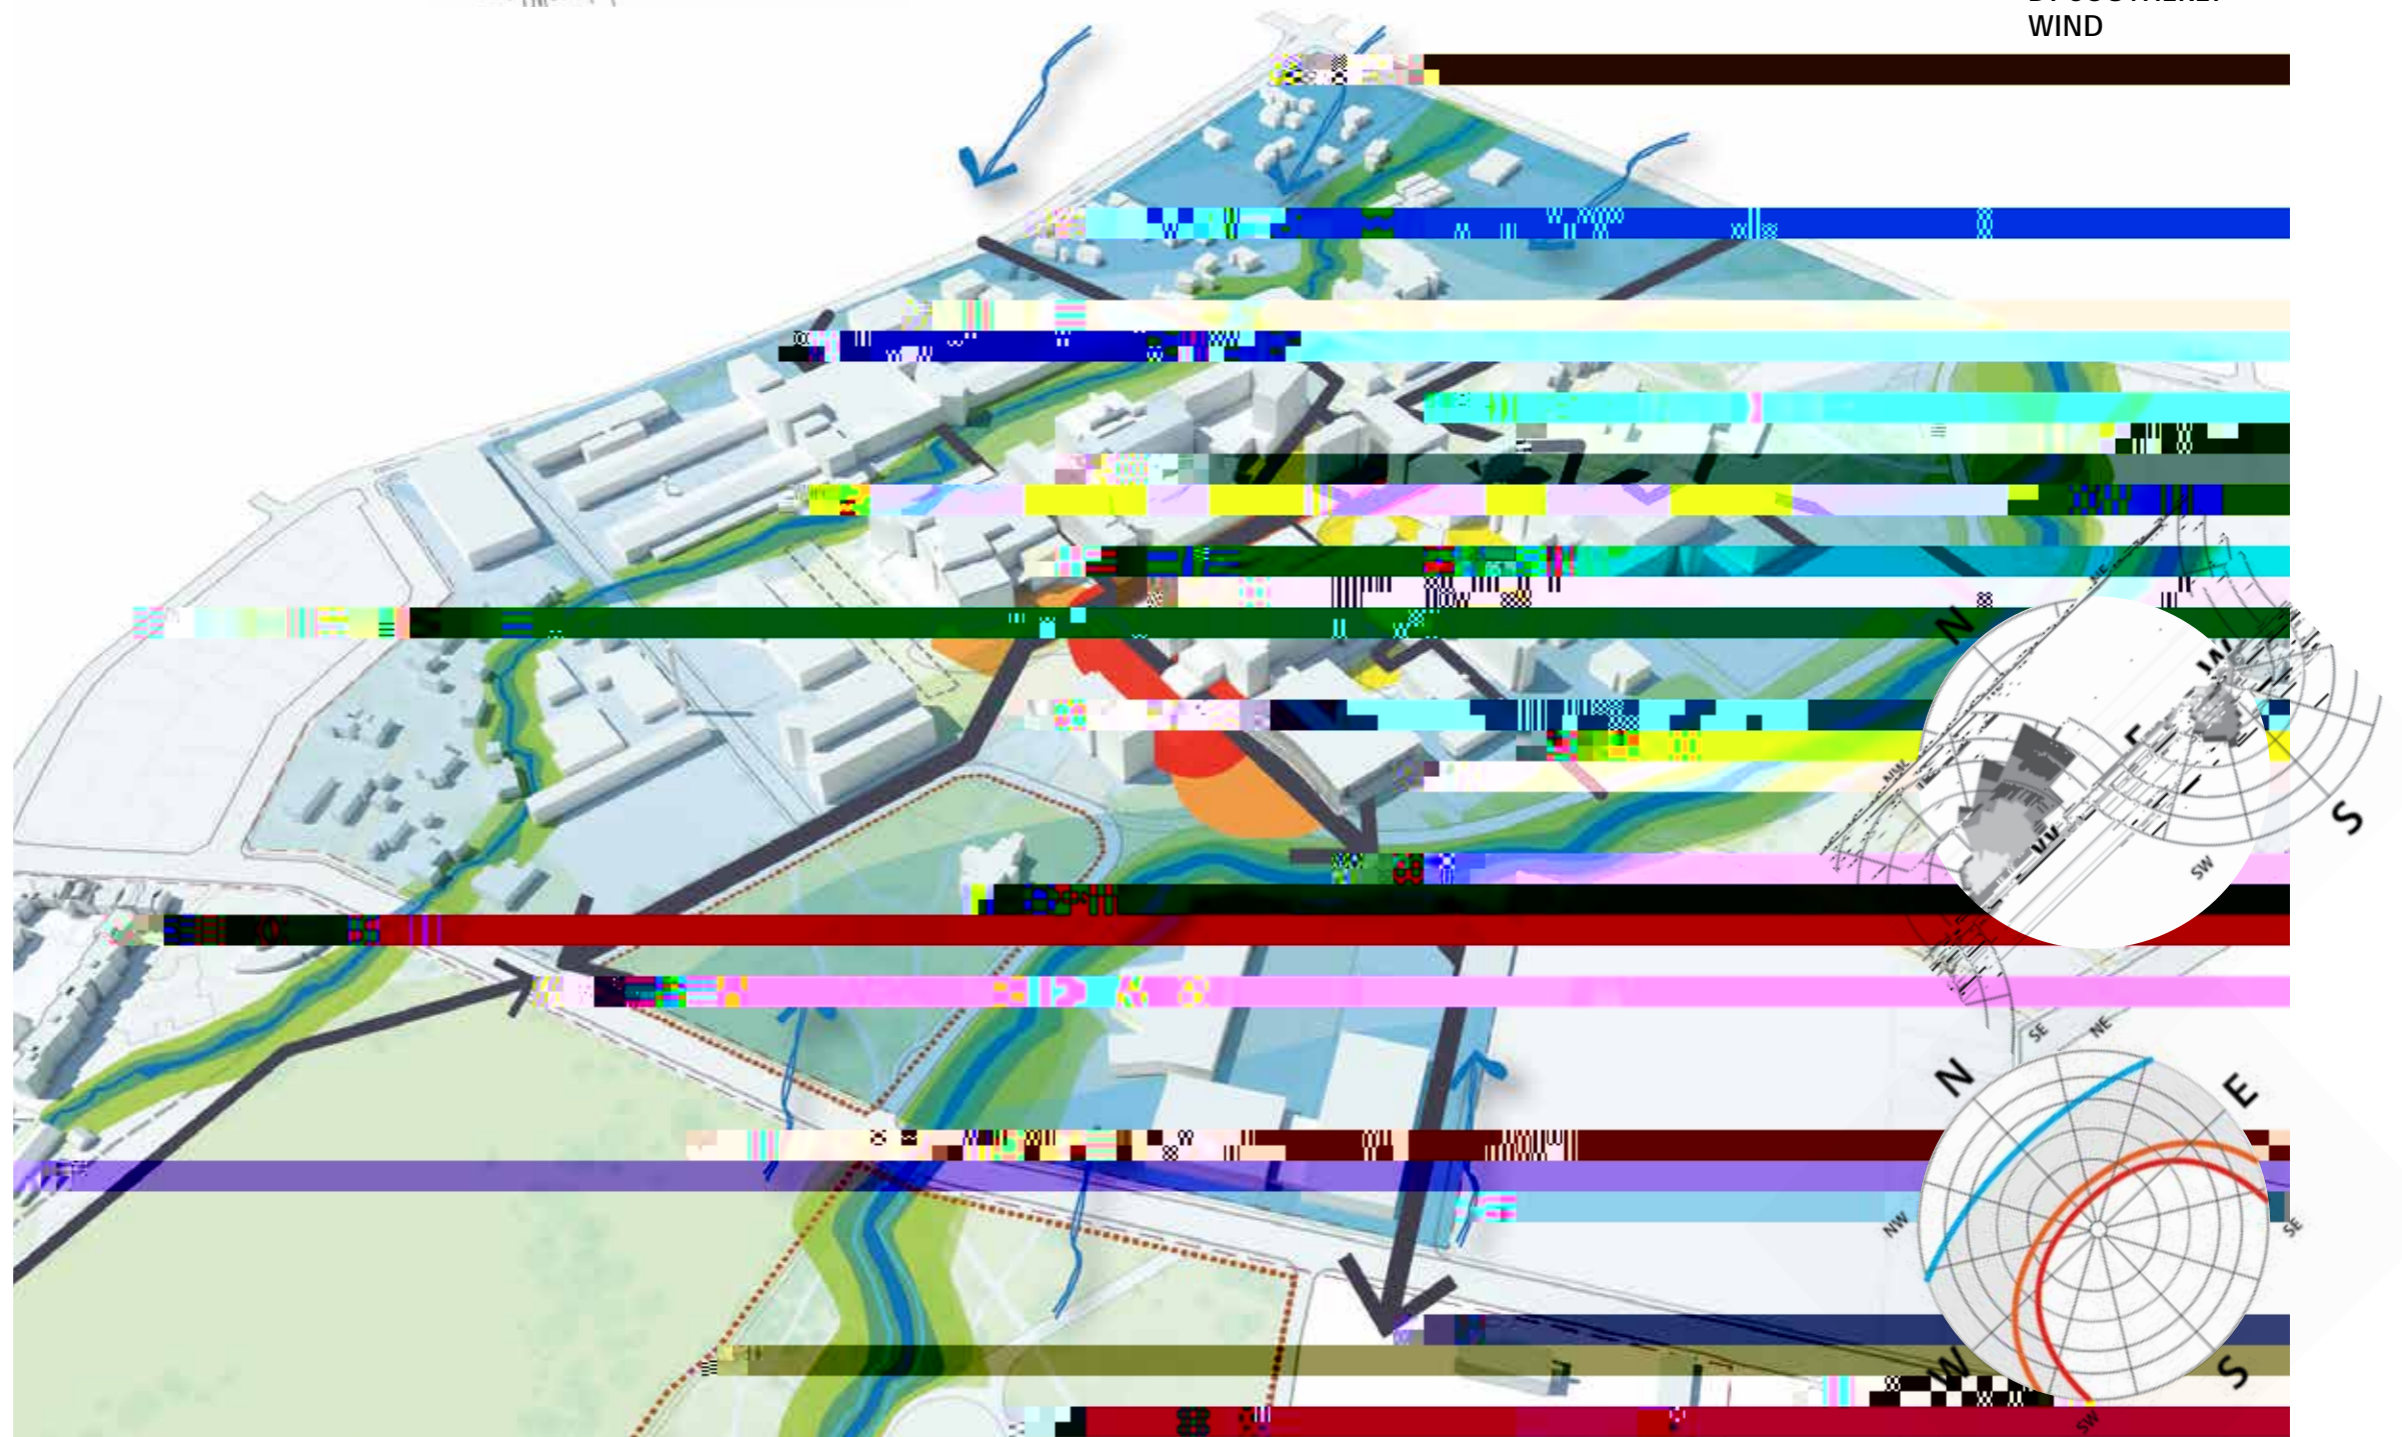

3.4 Theme: Winter Campus community

Inhabiting the winter campus with a focus on micro climate management to create a protected communal core of activated learning streets and opportunistic laneway spaces inserted into
